

Case Investigation and Escalation Policy

Document Code: FRAUD-004 | Version: 3.2 | Effective Date: 01-Apr-2026 | Status: Active

1. Analyst Review SLA

A Flagged transaction (risk score 45-74) must receive first analyst review within 4 business hours. An Auto-Freeze transaction (risk score 75+) must receive first analyst review within 1 hour, given the customer impact of a held transaction.

2. Escalation Ladder

Level	Trigger	Owner
Level 1	Standard flagged/frozen review	Fraud Analyst
Level 2	Analyst cannot reach a determination within SLA, or customer appeal unresolved 24h+	Senior Fraud Analyst
Level 3	Cross-border high-risk-jurisdiction match, or case value above Rs. 5,00,000	Fraud Risk Committee

3. Customer Notification and Appeal Rights

Every auto-frozen transaction triggers a customer notification within 2 hours (SMS/app notification), stating the transaction is under review and providing an appeal channel. Silence from the customer is never treated as an admission -- an unresolved case still follows the standard investigation timeline.

4. Provisional Credit Rules

Where a confirmed-fraud determination is reached and the customer bears no fault (e.g., unauthorized third-party transaction), provisional credit is issued within 10 business days of confirmation, pending final reconciliation.
